

PRINTING AND ASSEMBLY

1. Print all four pages using Actual Size or 100%. Do not select Fit to Page.
2. Cut out each 6 x 6 inch pattern square along the outside cutting line.
3. Arrange the pages in two rows: 1-2 and 3-4.
4. Align the edges and design lines. Tape together from the front or back.

See the separate three-page instruction guide for tracing and painting instructions.

REMINDER: Your board may not measure exactly 12 x 12 inches. Before tracing, center the assembled pattern and adjust its placement on the board as needed.
